

Least Restrictive Practice Bulletin

At the first meeting of the Least Restrictive Practice project group we did lots of group work to have a think about what Restrictive practice means to everyone as it is potentially such a large topic area. Some people think solely about seclusion and restraint for example, whereas for others the majority of things we do can be deemed as being restrictive. We wanted to look at this topic in its widest sense. We looked first at the question “What does restrictive practice mean to you?” then “If restrictive practice is deemed to be unavoidable—how should it be monitored and carried out?” We then went on to look at the definition of restrictive interventions according to the Code of Practice and asked everyone to think about any times where it might be necessary to restrict someone and why? We finished off the group work by looking at what we can do to reduce restrictive practice, and finally planning for the future—what does everyone want to look at next time and in future groups. All the group work can be found throughout this bulletin. We also looked at the new code of practice and what that says about restrictive practice, and we talked about Positive and Proactive Care: reducing the need for restrictive interventions.

Positive and proactive

Code of Practice: Mental Health Act 1983

Least Restrictive Practice Group Agenda

9th December 2015 14.00 - 16.00

1. Welcome and Introductions
2. **Group work** – What does Least Restrictive Practice mean to you?
3. The Code of Practice – Benefits and Challenges

4. **Group work** – Planning the work stream for the future
5. Planning next agenda

Date of next meetings: To be confirmed on the day

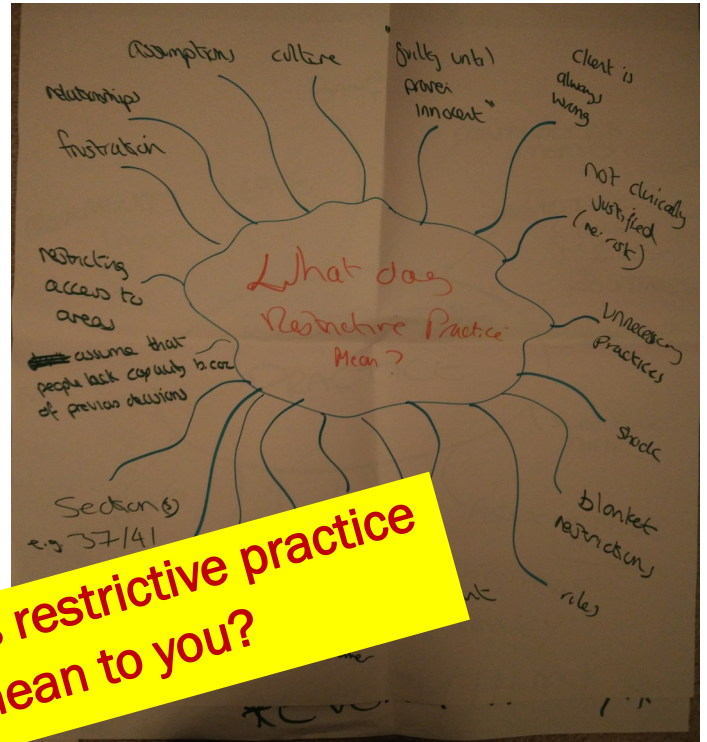

Contents

Summary of last meeting	1
Group work—what does it mean to you?	2
Group work— why would you use it?	3
Group work— How should it be applied?	4
Group work—how can we reduce it?	5
Group work—future planning	6
Poster for next meeting—11th March 2016	7

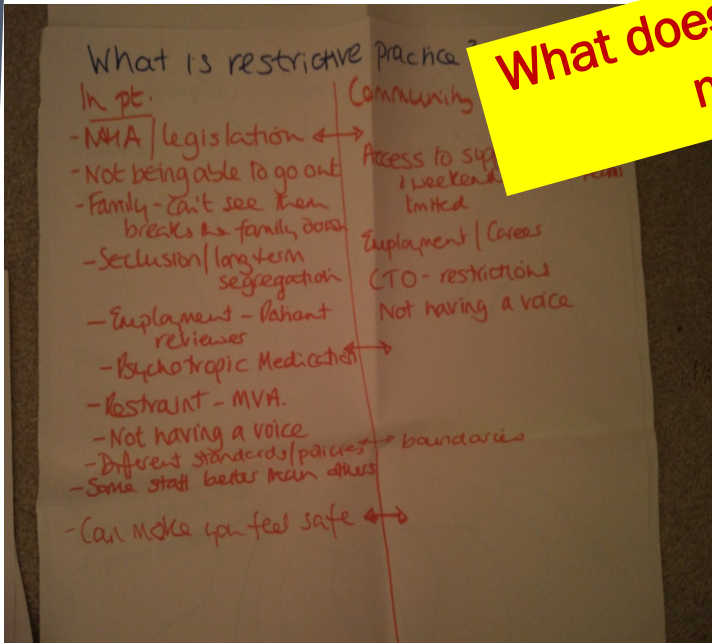

Least Restrictive Practice Group work

Assumptions. Culture

- Guilty until patient innocent
- Client is always wrong
- Not clinically justified re: risk
- Unnecessary practice. Shock
- Blanket restrictions. Rules
- Restraint. Abuse of power
- Punitive. Isolation
- Old habits. Contraband rules
- Sections e.g. 37/41
- Assume that people lack capacity because of previous decisions
- Restrictive access to areas
- Frustration. Relationships

What does restrictive practice mean to you?

- Movement. Leave
- Banned items. Controlled items
- Mealtimes (time, choice, amount)
- Routines. Smoking
- Sleeping times
- Association (family/friends)
- Possessions. Facilities
- Money. Legal
- Physical and psychological
- Activities
- **Everything!**

MHA legislation

- Not being able to go out
- Family—cant see them—breaks the family down
- Seclusions/ long term segregation
- Employment—patient reviewer
- Psychotropic medication
- Restraint—MVA
- Not having a voice
- Different standards/policies—boundaries
- Some staff better than others
- Can make us feel safe
- Community—
- CTO restrictions. Employment/careers.
- Access to support overlaps—at weekends crisis team limited.

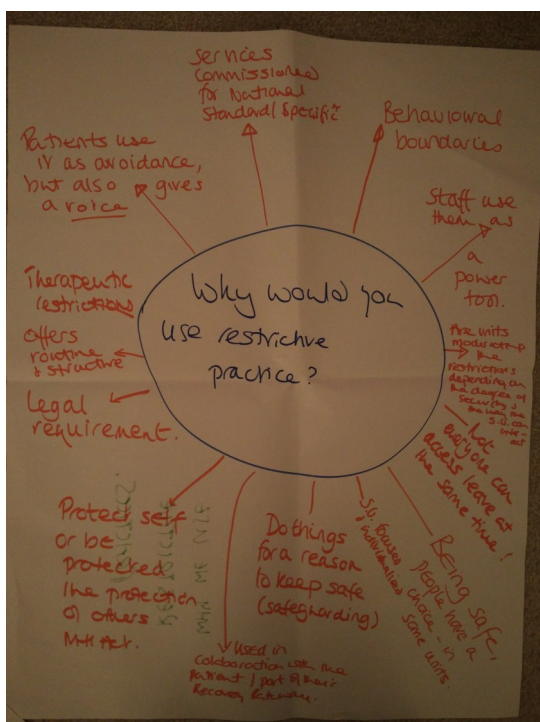

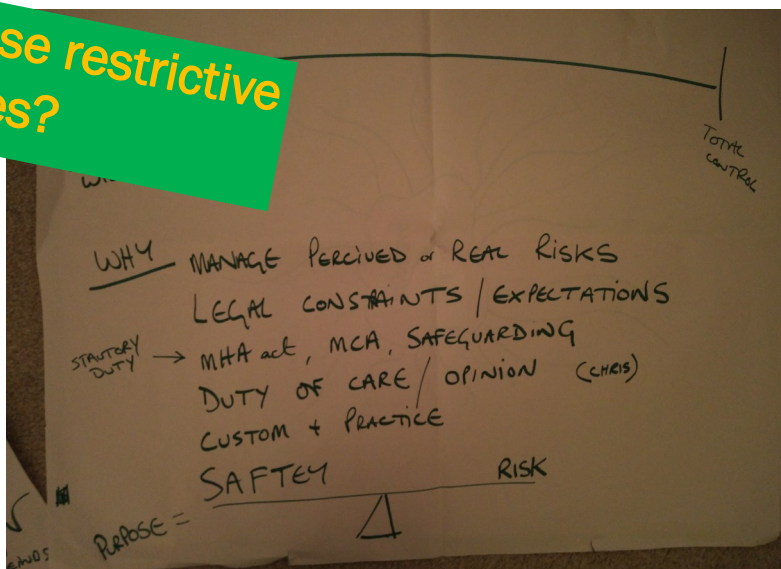

- Protect you and others around you
- Stop being drunk and disorderly
- Damage to physical health
- Money
- Sleep hygiene
- Damage to mental health
- Damage to property/environment
- Access to property (cigarettes)
- Access to caffeine/sugar
- AWOL absconding
- Insight. Substance misuse
- Self harm. Capacity
- Shadowed leave
- Confidentiality, privacy, dignity
- Internet use. Staffing levels
- Contact with negative influence—e.g. drug dealer

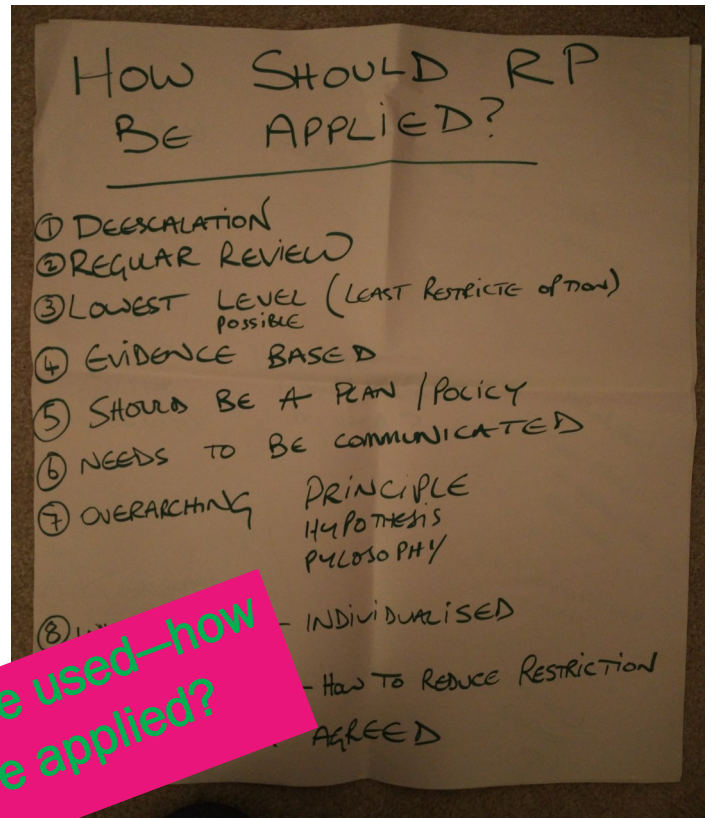

Why would you use restrictive practices?

- Do what thou will - Total Control
- Why?
- Manage perceived or real risks
- Legal constraints/ expectations
- Statutory duty—MHA, MCA, safeguarding
- Duty of care/ opinion
- Custom and practice
- Safety
- Purpose = balance between safety and Risk

- Patients use it as avoidance but also gives a voice
- Therapeutic restrictions
- Offers routine and structure
- Legal requirement
- Protect self or be protected—the protection of others—
- MHA Services commissioned for national standards/ specific
- Behavioural boundaries
- Staff use them as a power tool
- The units moderate the restrictions depending on the degree of security and the way the service user can interact
- Being safe
- People have a choice in some units
- Service user focused and individualised
- Do things for a reason—to keep safe (safeguarding)
- Used in collaboration with the patient—part of recovery journey

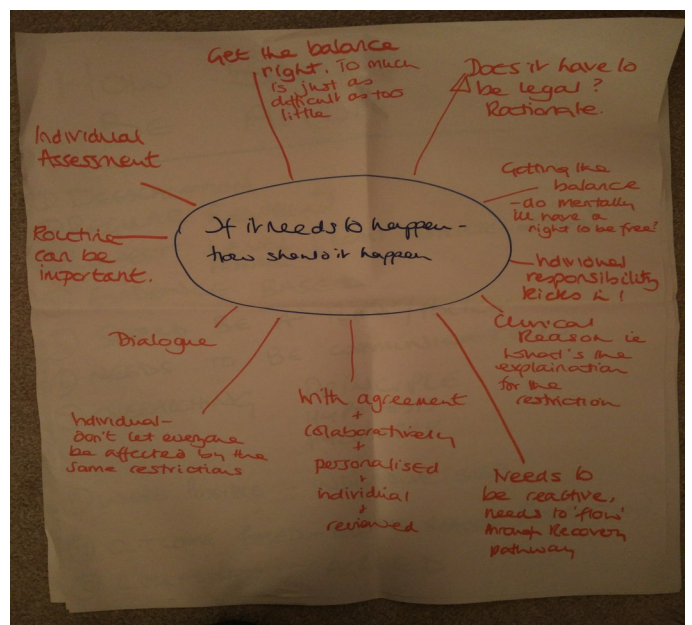

- de-escalation
- Regular review
- Lowest level possible (least restrictive of options)
- Evidence based
- Should be a plan/ policy in place
- Needs to be communicated
- Overarching principle, hypothesis and philosophy
- Where possible—individualised
- Outcomes based—how to reduce restrictions
- Collaboratively agreed

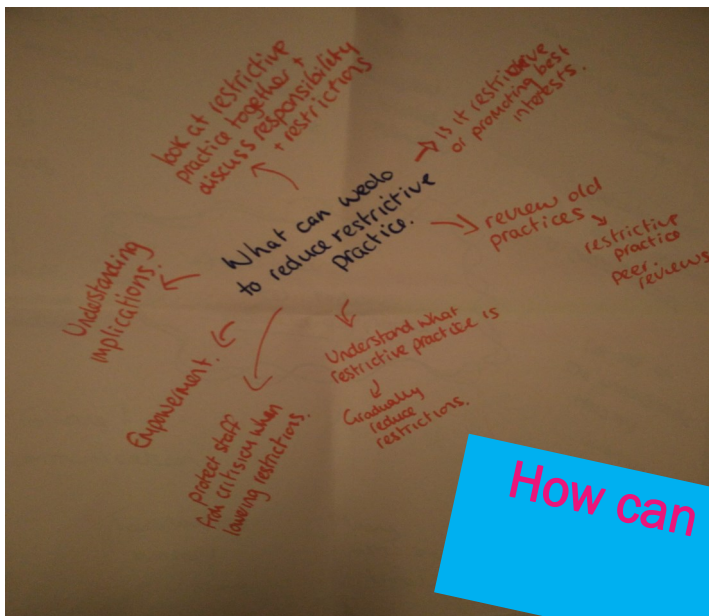

If it needs to be used—how should it be applied?

- Fluid. Consistency
- Clinically justified
- Risk assessed
- Contextual
- Up to date—in the loop
- Transparency
- Reviewed regularly
- Collaboratively
- All things considered (reasonable and legal)
- Communicated well
- Individualised
- Using policies as guidance rather than set in stone

- Get the balance right—too much is just as difficult as too little
- Does it have to be legal? Rationale
- Getting the balance—do the mentally ill have a right to be free?
- Individual responsibility kicks in!
- Clinical reason i.e. what is the explanation for the restriction
- Needs to =be reactive—needs to “flow” through the recovery pathway
- With agreement and collaboratively and personalised and individual and reviewed
- Individual—don't let everyone be affected by the same restrictions
- Dialogue. Routine can be important
- Individual assessment

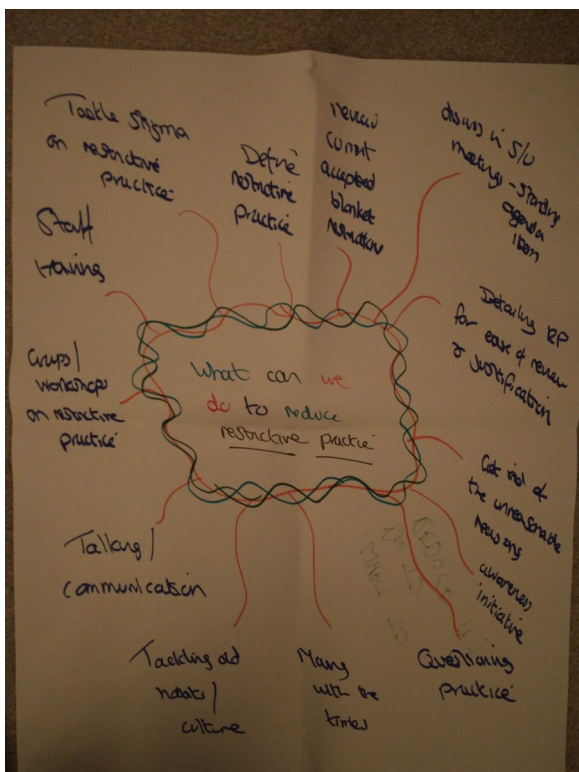

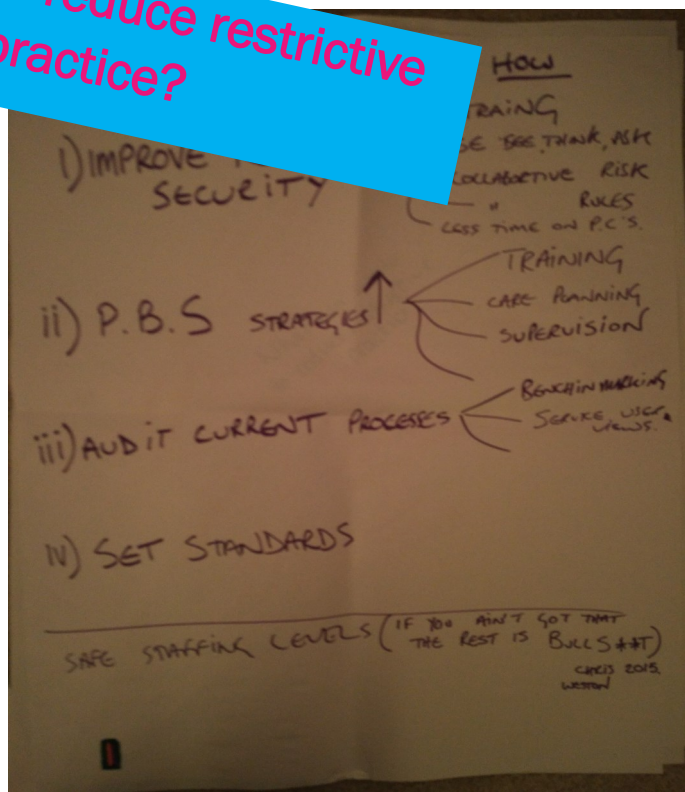

Look at restrictive practices together and discuss responsibility and restrictions
 Is it restrictive or promoting best interests?
 Review old practices—restrictive practice and peer reviews
 Understand what restrictive practice is
 Gradually reduce restrictions
 Protect staff from criticisms when lowering restrictions
 Empowerment
 Understanding implications

How can we reduce restrictive practice?

1. Improve relational security
 - Training, - use See think act
 - Collaboratively risk assess collaborative rules
 - Less time on computers
 2. Increase positive behaviour support strategies
 - Training
 - Care planning
 - Supervisions
 3. Audit current processes
 - Benchmarking
 - Service user views
 4. Set standards
- ** Safe staffing levels (if you do not have them then the rest is B*ll sh*t

- Tackle stigma on restrictive practice
- Staff training
- Define restrictive practice
- Review current accepted blanket restrictions
- Discuss in service user meeting—standing agenda item
- Detailing restrictive practice for ease of review and justification
- Get rid of unreasonable restrictions
- Questioning practice
- Moving with the times
- Tackling old habits/ culture
- Talking and communication
- Groups/ workshops on restrictive practice

Sharing good practice with other services
 Personalisation of care
 Newsletters, experience stories
 What stops change?
 Voice ideas/ peer reviews, input into standards
 Experiment with new ideas/ restricted from providing independence and safety
 Sharing policies to find new ways of promoting independence and reducing restrictions
 Language used to communicate

→ Sharing good practice with other services.
 → Personalisation of care.
 → Newsletters, experience stories.
 → What stops change??
 → Voice Ideas/peer reviews, input into standards.
 → experiment with new ideas / restricted from proving independence and safety
 → Sharing policies to find new ways of promoting independence and reducing restrictions.
 → language used to communicate.

**Planning for the future—
 what do we want to look at
 in future groups?**

4
 MANAGE EXPECTATIONS
 RESTRICTIVE PRACTICE MORE
 IN LINE WITH LEVEL OF SECURITY
 LINK TO PATHWAY—
 SOME LEVEL OF CONSISTENCY
 IMPROVED TRANSITION
 BETWEEN SERVICES.
 DEVELOP CULTURE OF POSITIVE
 RISK TAKING. (HYPOTHESIS TESTING)
 SALMONELLA!
 (EDWINA CURRY 198?)

Manage expectations
 Restrictive practice more in line with level of security
 Link to pathway
 Some level of consistency
 Improved transition between services
 Develop a culture of positive risk taking (hypothesis testing)
 Salmonella (Edwina Curry 198?)

Examples of least restrictive practice (what is already working/ being done)
 Complete collaboration in decision making (outside persons making decisions uninformed)
 Emphasis on individual differences between services on same site
 Idea for attacking/ changing culture
 Avoiding vigilantes
 Guidance on “what is” and “what isn’t” restrictive
 Blanket policy implementation
 Ways to audit restrictions (day to day)

Becoming a CQUIN? What will the guidance say?

Least Restrictive Practice Project Group

Friday 11th March 2016

Sandal Rugby Club Wakefield

2 – 4 pm

Refreshments Provided

Role Description for attending Yorkshire and Humber Network meetings:

Represent your service and share experiences and ideas

Celebrate achievements and share learning

Find out what is happening in other services

Give your perspective

Meet staff and service users from other services

Take back and share what you have learnt with people in your service
